PRE ANESTHEIC CHECKUP

PATIENT INFORMATION

Name : SUBHODH SINGH	Registration No : 541253	BP : 180/91	Date : 22/10/2021
Age : 25	Hospital Name : Udai Hospital	HR : 15	Time : 11:30am
DOB : 17/10/1991	Height(cm) : 5.8ft	SaO2 : 32	Proposed Operation :
Sex :Male	Weight (kg) : 68kg	BMI : 64.2	Pre-Operative Diagnosis :
Pincode : 110016	ASA Physical Status : 2	Side : Left	Allergies :

LABORATORY DATA

Total Bil : 1.5	Dir. Bil : 0.5	Alk Phos : 88	SGOT : 55	SGPT : 76	LDH : 04
Urea : 55	Creatine : 1.7	Na : 5.8	K : 5.8	Ca : 1.9	Mg : 2
Hb : 15	WBC : 12000	Platelets : 2.1	PCV : 44	Alb :	Protein :
APTT : 15	PT : 22	INR : 1.5	RBS : 120	PPBS : 120	HbA1c : 6.2
ECG : Nsr	HIV : -ve	HBS Ag : -ve	HCV : +ve	RTPCR : +ve	
Other :	Other :	Other :	Other :		
Cardiac echo : Dilated lv apical hypokinesia Roma status MV prosthetic valve			Chest X-Ray : Nodule in the upper right lobe, trachea deviated to the right		

Other :

CSV

HTN

How long
: 10
years

Stress/Angio :
No

Treatment : Losartan amlodipine metoprolol

Angina

Status :
Stable

Taking
treatment :
Yes

Duration of treatment? : 10

What causes Angina? :
Walking up stairs 2 flights

How it stops? : Rest or sorbitrate or both

MI

When :
19 years

Medical :
Thrombolysed

Stented :
Yes

Treatment :

When :
19 years

Stopped
Antiplatelet :
No

Antiplatelet
: Yes

Antianginals
: Yes

Statins
: Yes

Anticoagulant
: Yes

What Treatment :

Other :

Symptoms
Improved
: Yes

CABG : No

When :

Symptoms
improved :
Yes

Both Stented and CABG
: No

Type of Graft :

Repeat CAG :

NYHA

NYHA Class : Class I (Mild)

Pacemaker

Why :
Testttt

Pacemaker
make / Type? :
dfsdfsdfsdf

When :

Check paperwork /
Card / Chest xRay

RESP

Asthma

What causes :

Treatment :

How long :	When did the last attack occur :	How was it treated :	URTI LRTI Present : Yes	Advisory : Physical Consult
<i>Smoking</i>				
How Many :		When did you stop it : Yes		
How Long :				
<i>Snoring</i>				
Stop BANG Score :	Sleep Study : Yes	CPAP :	OSA : Yes	Do you fall asleep in the daytime : No
<i>Cough</i>				
How Long :		What Cause : Yes		
<i>Sputum</i>				
How Long :		Color : Yes		
What treatment :		How Long :		
CNS				
<i>Stroke</i>				
When :		Present status : Recovered		
What treatment :				
<i>Epilepsy</i>				
How long :	Last seizure :	Medication :	Neurology consult : Yes	
<i>Surgery</i>				
Brain				
What surgery?		Residual effect		
Spinal Cord				
What surgery?		Residual effect		
<i>Cognitive Impairment</i>				
Mini-Cog Score :	Give the patient 3 tries to repeat the words :		If subject has not finished clock drawing in 3 minutes :	

RENAL		
<i>Stones</i>		
Surgery needed : Yes	Status : Present	
What surgery :		
<i>Failure</i>		
Urea :	Creatinine :	
Hemo		
Frequency :		
Peritoneal		
Frequency :		
Fisual		
<i>UTI</i>		
When :		
Treated :	CUE :	What drugs
Diabetes		
Rx : Yes	How much ? : Present	
What surgery :		
Complications : Eyes	Diet : Deit Control	Sugar check at home : Yes
Hepatic/GE		
<i>Jaundice</i>		
When :		
Cause :	Viral status :	
Child criteria :	I.N.R :	
<i>Reflux</i>		
"Prescribe H2 / PPI / Metoclopramide Warning Rapid Sequence No LMA."		
Other		
<i>Thyroid</i>		
Hyper	What treatment :	

<i>Supplement/Stroid</i>			
Supplement Steroid pre-op			
<i>Frailty</i>			
Supplement steroid :		Steroid intake in last 6 months :	
Frailty score			
Cognition : Other Errors	General health status : 0	How would you describe your health? : ‘Excellent’, ‘Very good’, ‘Good’	
Functional independence : 2-4	Social support : Sometimes	Medication use : Yes
